Section (IV) comprehension

When a person ill, it may be difficult or him to control his emotions. The patient become more sensitive to the works and actions of other people and is placed in a position of dependence that is often difficult for him to accept. As a result, he may become depressed and anxious .

A nurse can do several things to relieve a patients anxiety. Although the particular needs of the patient must be me on an individual basis, there are some guiding principles that maybe helpful :

First, it is easier to relieve anxiety when we know what is causing it. The patient should be encouraged to talk about his worries or fears .

Second, people feel less anxious when they know what is going to happen to them and that they are in good hands. They want to be told what is wrong with them, and, if that they are told in a way that can understand, much of their anxiety can be limited.

Third, loneliness and loss of control of the situation aggravate a patient's anxiety and make him think that things are much worse than they really are.

101. What does the passage mainly discuss?

- | | |
|-----------------------------|---------------------------|
| 1) emotion disorders | 2) depression and anxiety |
